Enrol additional teachers in the course

From now on, course participants with the role “Dozent“ can enrol additional teachers to their moodle course.

This is how you add additional teachers to your course:

2. Click the ‘Enrol users’ button at the top right of the page
3. Use the ‘Assign roles’ dropdown and change the role to “Dozent”. Search for the user by name or e-mail address.

4. Click the ‘Enrol’ button opposite the user. The user will intend in the list and the enrol button will disappear, indicating that the user is enrolled.
